

HALL® Mpower™

MPowered Performance

Hall® MPower™ Sternum Saw

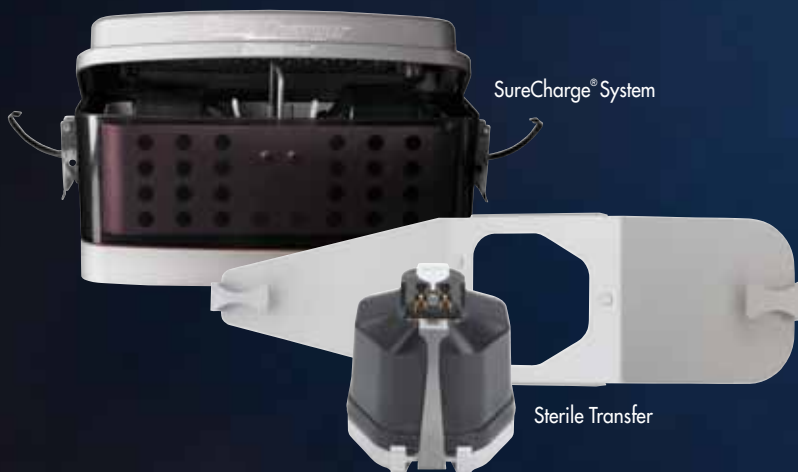

- > Multiple battery options
- > Smooth, reliable power with variable speed
- > Ergonomic pistol grip design for maximum comfort and control
- > Totally sealed handpiece to allow use of a washer/sanitizer
- > 2-year warranty
- > Streamlined design with two blade/saw guard sizes for the optimum visibility of the surgical site

Autoclavable Batteries

The small but powerful PRO3020 12V battery provides uncompromising power that can be sterilized using flash sterilization, STERRAD, or pre-vac steam sterilization with the SureCharge Battery Case. The SureCharge battery case enables batteries that have been cleaned and sterilized to be fully charged and stored on the PRO3600 Universal Charger.

Sterile Transfer

The Sterile Transfer Battery System is an excellent option for thoracic surgery applications. The Sterile Transfer Battery System ensures optimal battery performance through an aseptic transfer of a battery cell pack that is not subject to the heat of an autoclave.

Washer/Sanitizer

All of the MPower handpieces are totally sealed for use in a washer/sanitizer, creating value by enabling quick and consistent cleaning of all MPower powered instruments.

Warranty Program

The 2-year warranty speaks to the confidence we have in the reliability of our equipment. The 2-year standard warranty is a significant cost savings as compared to buying extended warranties.

Standardization

The MPower Sternum Saw uses the same blades and blade guards as the current Hall® Pneumatic Sternum Saw.

Catalog No.	Product Description	Catalog No.	Product Description
HANDPIECES		ACCESSORIES	
PRO6450	MPower™ Battery Sternum Saw including Wrench	5030-010	System Sterilization Case
